

LABORATORY PRODUCTS & SUPPLEMENTS · UNITED ARAB EMIRATES

The Lab Reorder Pack

How to specify a laboratory order so the quote comes back right the first time — and the sheet we quote from.

- 01 Spec it once, quote it once**
The fields that decide whether a quote is usable — by category.
- 02 What we supply**
Four catalogue lines, plus scientific services and supplements.
- 03 How ordering works**
Three steps, and the answers procurement always asks for.
- 04 The reorder template**
An editable sheet you fill in and send back — included with this pack.

sales@arlabstech.com · WhatsApp +971 56 605 2666 · arlabstech.com

Quotes usually returned within 24 hours (one business day), with stock status and lead times stated.

01 — SPEC IT ONCE

The five lines that decide whether a quote is usable

Most quoting delay is not sourcing — it is a second round of questions. State these five things on every line and the reply comes back priced, not queried.

Quantity and pack size	20 racks of 96 — not '20 tips'
Brand you run now	Or write 'equivalent acceptable', which widens the sourcing
Grade or purity	AR / ACS, HPLC, molecular biology, cell culture, technical
Date you need it on site	It changes the sourcing route, not just the price
Documentation required	Datasheet, SDS, CoA — say so before the order, not after

BY CATEGORY

Add these where they apply

Equipment & instruments

- ☐ Capacity and readability (0.1 mg, 50 L, 160 L, rpm / rcf)
- ☐ Bench space, door width and power supply (220–240 V single phase or three phase)
- ☐ Accessories that must ship with it: rotors, probes, racks, spare filters
- ☐ Installation, commissioning or operator training required
- ☐ Warranty period and after-sales support expected

Chemicals & reagents

- ☐ CAS number where one exists — it removes all ambiguity
- ☐ Grade: AR / ACS, HPLC, molecular biology, cell culture
- ☐ Pack size and number of packs
- ☐ Storage and cold chain: 2–8 °C, –20 °C, –80 °C
- ☐ Shelf life remaining you will accept on arrival
- ☐ Intended end-use, if the item is controlled or restricted

Molecular & life science

- ☐ Target and species; sample type
- ☐ Assay format and number of plates
- ☐ Sensitivity or detection range required
- ☐ Validation data you need to see before ordering

Consumables & plasticware

- ☐ Sterile or non-sterile; autoclavable or single use
- ☐ Volume, dimensions and rack format
- ☐ Treatment: TC-treated, low-retention, vented cap, conical
- ☐ Whether it must fit an instrument or rack you already own

Water treatment chemicals

- ☐ System: potable, process, cooling or waste water
- ☐ Active strength or concentration required
- ☐ Volume per delivery and delivery frequency
- ☐ Dosing method installed; whether dosing guidance is needed

Can't specify it all? Send it anyway.

Catalogue numbers, a rough spec, or a photo of what you're running low on — we work from whatever you have. The catalogue on arlabstech.com is a sample, not a limit: items outside it are sourced through manufacturer and channel partners.

02 — WHAT WE SUPPLY

Four catalogue lines, one supplier

Everything a working laboratory orders month to month — consolidated onto one purchase order instead of five vendors, with the scientific expertise to help you specify it.

Equipment & Instruments	Balances · Centrifuges · Microscopes · Biosafety Cabinets · Incubation & Sterilisation · Analysers
Consumables & Plasticware	Pipette & Filter Tips · Tubes & Vials · Plates & Dishes · Cell Culture Flasks · Serological Pipettes · Glassware
Chemicals & Reagents	Cell Culture Media · Buffers & Solutions · Molecular Biology · Antibodies & Proteins · ELISA & Assay Kits · Stains & Dyes · Laboratory Chemicals
Water Treatment Chemicals	Coagulants & Flocculants · Disinfection & Chlorination · pH Adjusters · Scale & Corrosion Control · Biocides & Algaecides · Testing Reagents — 17 items listed
Scientific & Bioinformatics Services	Sequencing data processing (bulk & single-cell) · Genomics & transcriptomics pipelines · QC & reproducible workflows · Figures & reporting · Instrument selection · Method & protocol guidance · New-lab setup lists
Supplements	Nutritional and health supplements with documented sourcing, certificates of analysis on request, UAE-compliant labelling — bulk or retail quantities

WHO WE SERVE

University & institutional research laboratories

Clinical & diagnostic laboratories

Industrial, QC & food-testing laboratories

Biotech & pharmaceutical R&D teams

Clinics, wellness centres & supplement retailers

61 items are listed online today.

The catalogue at arlabstech.com/shop is a working sample across the four product lines — specialised chemicals and instruments outside it are sourced on request.

03 — HOW ORDERING WORKS

Send your list. Get a quote. One delivery.

01	Send your list Catalogue numbers, a spec, or a photo of the shelf. Whatever you have is enough to start.
02	We quote Priced and sourced, usually within 24 hours, with stock status and lead times stated up front.
03	We deliver One consolidated delivery across the UAE, or shipped onward to the wider Gulf.

WHAT PROCUREMENT ASKS

Answered before you ask

Lead times	In-stock items ship quickly; indent and special-order items depend on the manufacturer. The exact lead time is confirmed in your quote before you commit.
Payment terms	Bank transfer, card, and approved credit terms (LPO) for trade accounts. Terms are confirmed with your quote.
Tenders & bulk supply	Supported for institutions — tenders, LPOs and scheduled bulk supply, with full documentation. Contact sales to set up a trade account.
Hazardous or controlled chemicals	Supplied for professional, research and industrial use. Certain items require proof of eligibility, end-use declarations or regulatory approval — we guide you through what is needed.
Cold chain	Temperature-sensitive reagents and biologicals ship under appropriate cold-chain conditions, noted on your quote.
Delivery area	Across the UAE and the wider GCC, with worldwide shipping arranged on request.
Lab fit-out projects	Full fit-outs and equipment projects delivered with our partners — from specification and supply to installation and after-sales support.

Next step: send the list.

Fill in the reorder template that came with this pack — or simply forward your current order sheet. We reply from sales@arlabstech.com, usually within one business day.
